Yazd History —

The City of Yazd is located in the middle of the Iranian plateau, 270 km southeast of Isfahan, close to the Spice and Silk Roads. It bears living testimony to the use of limited resources for survival in the desert. Water is supplied to the city through a qanat system developed to draw underground water. The earthen architecture of Yazd has escaped the modernization that destroyed many traditional earthen towns, retaining its traditional districts, the qanat system, traditional houses, bazars, hammams, mosques, synagogues, Zoroastrian temples and the historic garden of Dolat-abad.

Company Profile

KIAN JAMEH
DESIGN & GARMENT MANUFACTURING

Kian Jameh Iranian Clothing Industries is a denim and jeans corporation founded in December 2015 in a plot area exceeding 2400 square meters with a 2000 square meters built area in Yazd Special Economic Zone, Iran. The company uses the state of the art technologies for designing, manufacturing, marketing, and selling cotton clothes products.

The company incorporates a design and sampling department, a cutting, stitching, and laser department, a washing department, and a finishing and packing department in order to address for all the necessities in manufacturing denim and jeans products.

Overview

Being equipped with the latest relevant knowledge and technologies, using quality raw material, and having an all replenishing in-depth understanding of the market are the special assets which make the company one of the most competing producers of jeans, denim, and serge products in the domestic and neighboring markets. Currently, over 150 employees are engaged in producing quality products with competitive prices to be sold in the Middle Eastern countries. The long term plan of Kian Jameh, however, is to boost up the production capacity and workforce by 50 percent in order to add a variety of other products to the production line and export them directly to the neighboring foreign markets.

Mission & Vision

Currently, Kian Jameh Clothing Industries is focused on designing and manufacturing jeans and denim pants from start to finish all inside the company. The company's medium-term goal is to achieve the annual production capacity of 300,000 pairs of pants by the year 2022.

The company's vision for the year 2027 is to produce up to 500,000 pairs of jeans and denim pants per year and add up new products like shirts and T-shirts to the production lines.

One major concern in the routine and the roadmap of Kian Jameh Iranian Clothing Industries is to enjoy its advanced equipments and the knowledge and capabilities of its trained personnel to create and maintain strong ties with its national and international customers and satisfy their tastes by providing high standard products with competitive prices.

Technology & Raw Materials

Kian Jameh Iranian Clothing Industries has contracted the best companies in the field in order to handpick and acquire the best and most advanced recent technologies and equipments. Stitching machines are bought from the Japanese companies Juki and Brother; the software come from the French company Lectra; the cutting, wash & dry, and laser machines are bought from the Turkish companies Ozbilim, Karmak, and VAV; and finishing machines come from the Italian company Viet and the Turkish company Malkan. In order to maintain the company's major goal, which is producing products with internationally competitive quality and prices.

Slim Fit

MODELS

JEANS

Slim fit jeans have a narrow leg opening that doesn't flap about or flare out and it is tighter fit than regular jeans. A step up from skin-tight but no means loose. Slim jeans are the most popular denim choice and with good reason; they're an easy-to-wear in-between that suits most shapes.

Skinny Fit

MODELS

JEANS

Skinny models are tight-fitting jeans with very narrow legs. Skinny jeans mean skinny from the waist till the ankle. Guys like wearing skinny jeans because it's more comfortable to wear than loose pants and shows the real shape of their legs.

Regular Fit

MODELS

JEANS

Regular fit jeans are one of the jeans fit types that fits straight from hip to thigh. It is usually worn by guys who are not too big boned or thin. Regular fit follows the natural or regular shape of the leg, which means that the jeans are somewhat smaller around the ankle compared to the straight type.

Comfort Fit

MODELS

JEANS

Comfort waist is a hidden elastic overlap in both side of the pants waistband. So, they stretch in the waist, if you gain a little weight. It is similar to sweatpants and you feel relaxed in it. You get jeans that are roomy at the top and have tapered legs.
