Synergy (AcadConnect) In 2015, AutoCAD released AcadConnect, a new extension to the Windows operating system. It uses the concept of virtual desktops and applications that allows users to manage multiple software applications in the same window, using a sidebar, instead of having to exit the application. AcadConnect is distributed as a stand-alone application and works as an alternative to the standard Microsoft Windows Task Manager. AcadConnect has the following features: Minimize all applications to the main windows area. Hide all applications except for the active application. Add applications to the sidebar by dragging them to the position. Add existing shortcuts to the list by adding the.scr file with the shortcuts. Control how many icons are shown by using the max-count and title-format option. AutoCAD 2019 In 2018, AutoCAD changed its name to "AutoCAD a1d647c40b"
